- Every 4-Pin logger is supported by every Solis inverter model except for the S6-EH1P(3.8-11.4)K series
- The USB versions of the loggers are only compatible with the S6-EH1P(3.8-11.4)K-H inverter series
- Each data logger is capable of supporting up to 10 inverters that are daisy-chained with RS485
- Loggers are commissioned using the SolisCloud app - a smart phone is required
- The loggers are all NEMA 4X outdoor rated and they consume less than 5W to operate
- System data is transmitted in 5-minute intervals and the rate cannot be increased
- The S1-W4G-ST logger comes with 5 and 10-year data plan options
